Case Study 14: Healthy Food and Nutrition Website

The Healthy Bites website provides information about nutritious food and healthy eating habits. It includes food categories such as salads, fruits, vegetables, and breakfast items. The healthy recipes section displays recipe images, calorie information, ingredients, and preparation steps. A daily meal plan suggests food for breakfast, lunch, evening snacks, and dinner. The healthy eating tips section encourages users to drink enough water, eat fruits and vegetables, choose whole grains, and maintain balanced meals. The website uses a green color theme and card-based layouts to make the information clear and easy to read.

- Main features: food categories, recipe cards, calorie details, ingredients, preparation instructions, daily meal plan, and healthy eating tips.
- Purpose: to help users explore healthy food choices and plan balanced meals.
- Design: green shades, simple navigation, readable text, and responsive card layouts.

Case Study 15: Yoga and Meditation Website

The Wellness Center website introduces users to yoga and meditation practices that support physical and mental well-being. It presents yoga poses, meditation techniques, instructor profiles, class schedules, and membership plans. The homepage uses a calming color palette and a yoga image to create a peaceful atmosphere. Each section is arranged in simple cards, allowing visitors to find information quickly. Wellness tips provide basic reminders about healthy food, hydration, regular yoga practice, and sleep.

- Main features: yoga poses, meditation guidance, instructor information, class timings, membership pricing, and wellness tips.
- Purpose: to share wellness information and help users learn about classes and membership options.
- Design: soft green backgrounds, clear headings, centered content, and simple navigation.

Case Study 18: Hotel Reservation Website Interface

The Dream Stay Hotel website presents room options and allows visitors to enter reservation details. It displays standard, deluxe, and luxury suite categories with room images, descriptions, facilities, and prices per night. A facilities section highlights services such as Wi-Fi, a restaurant, a swimming pool, parking, air conditioning, and room service. The reservation form collects the guest's name, email address, phone number, preferred room, check-in and check-out dates, number of guests, and special requests. This interface demonstrates how a hotel website can organize accommodation information and collect booking requests.

- Main features: room categories, room photos, facilities, tariffs, booking form, guest details, and date selection.
- Purpose: to help guests compare rooms and submit reservation requests conveniently.
- Design: blue and teal colors, room cards, clearly labeled form fields, and a prominent booking button.
